

[illegible]

P7 took place at	This property describes the spatial location of an instance of E4 Period. The related instance of E53 Place should be seen as a wider approximation of the <u>geometric area</u>	 CIDOC CRM v.7.1.3
-------------------------	--	---

P4 has time-span	This property associates an instance of E2 Temporal Entity with the instance of E52 Time-Span during which it was on-going. The associated instance of E52 Time-	 CIDOC CRM v.7.1.3
-------------------------	--	---

P2 has type	This property allows sub typing of CIDOC CRM entities – a form of specialisation – through the use of a terminological hierarchy, or thesaurus. The CIDOC CRM is	 CIDOC CRM v.7.1.3
--------------------	--	---

P1 is identified by	This property describes the naming or identification of any real-world item by a name or any other identifier. This property is intended for identifiers in general	 CIDOC CRM v.7.1.3
----------------------------	---	---

P44 has condition	This property records an E3 Condition State for some E18 Physical Thing. This property is a shortcut of the more fully developed path from E18 Physical Thing through P341 was	 CIDOC CRM v.7.1.3
--------------------------	--	---

P43 has dimension	This property records an instance of E54 Dimension of some instance of E70 Thing. In the case that the recorded property is a result of a measurement of an	 CIDOC CRM v.7.1.3
--------------------------	---	---

P16 used specific object	This property describes the use of material or immaterial things in a way essential to the performance or the outcome of an instance of E7 Activity. This	 CIDOC CRM v.7.1.3
---------------------------------	---	---

P14 carried out by	This property describes the active participation of an instance of E39 Actor in an instance of E7 Activity. It implies causal or legal responsibility. The P14.1 in the role of	 CIDOC CRM v.7.1.3
---------------------------	---	---

P67 refers to	This property documents that an instance of E89 Propositional Object makes a statement about an instance of E1 CRM Entity. P67 refers to (is referred to by)	 CIDOC CRM v.7.1.3
----------------------	--	---

P48 has preferred identifier	This property records the preferred instance of E42 Identifier that was used to identify an instance of E1 CRM Entity at the time this property was recorded	 CIDOC CRM v.7.1.3
-------------------------------------	--	---

P46 is composed of	This property associates an instance of E18 Physical Thing with another instance of Physical Thing that forms part of it. The spatial extent of the composing part is	 CIDOC CRM v.7.1.3
---------------------------	---	---

P45 consists of	This property identifies the instances of E57 Materials of which an instance of E18 Physical Thing is composed. All physical things consist of physical materials. P45	 CIDOC CRM v.7.1.3
------------------------	--	---

P86 falls within	This property describes the inclusion relationship between two instances of E52 Time-Span. This property supports the notion that the temporal extent of an instance of	 CIDOC CRM v.7.1.3
-------------------------	---	---

P82b end of the end	This is defined as the second boundary of the property P82	 CIDOC CRM v.7.1.3
----------------------------	---	---

P82a begin of the begin	This is defined as the first boundary of the property P82	 CIDOC CRM v.7.1.3
--------------------------------	--	---

P82 at some time within	This property describes the maximum period of time within which an E52 Time-Span falls. Since Time-Spans may not have precisely known temporal	 CIDOC CRM v.7.1.3

P104 is subject to	
This property links a particular instance of E72 Legal Object to the instances of E30 Right to which it is subject. The Right is held by an instance of E39 Actor as described by P75	 CIDOC CRM v.7.1.3

P100 was death of	
This property links an instance of E69 Death to the instance of E21 Person that died. An instance of E69 Death may involve multiple people, for example in the case of a battle or	 CIDOC CRM v.7.1.3

P98 brought into life	
This property links an instance of E67 Birth event to an instance of E21 Person in the role of offspring. Twins, triplets etc. are brought into life by the same instance of E67 Birth	 CIDOC CRM v.7.1.3

P90 has value	
This property allows an instance of E54 Dimension to be approximated by an instance of E60 Number primitive.	 CIDOC CRM v.7.1.3

P150 defines typical parts of	
This property associates an instance of E55 Type "A" with an instance of E55 Type "B", when items of type "A" typically form part of items of type "B" such	 CIDOC CRM v.7.1.3

P148 has component	
This property associates an instance of E89 Propositional Object with a structural part of it that is by itself an instance of E89 Propositional Object. This property is	 CIDOC CRM v.7.1.3

P128 carries	
This property identifies an instance E90 Symbolic Object carried by an instance of E18 Physical Thing. Since an instance of E90 Symbolic Object is defined as an	 CIDOC CRM v.7.1.3

P108 has produced	
This property identifies the instance of E24 Physical Human-Made Thing that came into existence as a result of the instance of E12 Production. The identity of an instance of E24	 CIDOC CRM v.7.1.3

R7 exemplifies	
This property associates an instance of F3 Manifestation with an instance of F5 Item that is one of its exemplars or its only exemplar. Instances of F5 Item correspond to	 LRMoo v.1.0

R4 embodies	
This property associates an instance of F3 Manifestation with one or more instances of F2 Expression which are rendered by this instance of F3 Manifestation. The	 LRMoo v.1.0

R3 is realised in	
This property associates an instance of F2 Expression with an instance of F1 Work. This property expresses the association that exists between an expression	 LRMoo v.1.0

P191 has duration	
This property describes the length of time covered by an instance of E52 Time-Span. It allows an instance of E52 Time-Span to be associated with an instance of E54	 CIDOC CRM v.7.1.3

R71 has part	
This property associates an instance of F3 Manifestation with a structural part of it that is itself an instance of F3 Manifestation. This property is transitive, asymmetric and irreflexive.	 LRMoo v.1.0

R24 created	
This property associates the instance of F3 Manifestation that was created during a particular instance of F30 Manifestation Creation with that instance of F30	 LRMoo v.1.0

R17 created	
This property associates an instance of F2 Expression that was externalised during a particular instance of F28 Expression Creation event with that particular creation	 LRMoo v.1.0

R16 created	
This property associates the initial creation of a work and the instance of F1 Work that was created.	 LRMoo v.1.0

L19 stores	
This property associates an instance of a D13 Digital Information Carrier with the instance of Digital Object that is stored on it.	 CIDOC CRM v.3.2.1

L11 had output	
This property associates an instance of D7 Digital Machine Event with an instance of D1 Digital Object which is the output of the activity.	 CIDOC CRM v.3.2.1

L1 digitized	
This property associates an instance of D2 Digitization Process with an instance of E18 Physical Thing which is a material thing.	 CIDOC CRM v.3.2.1

R78 has alternate	
This property associates an instance of F3 Manifestation with another instance of F3 Manifestation that exemplifies the same instance of E2	 CIDOC CRM v.3.2.1

P2 has type	
This property allows sub typing of CIDOC CRM entities – a form of specialisation – through the use of a terminological hierarchy, or thesaurus. The CIDOC CRM is	 CIDOC CRM v.7.1.3

P1 is identified by	
This property describes the naming or identification of any real-world item by a name or any other identifier. This property is intended for identifiers in general	 CIDOC CRM v.7.1.3

L57 has pixel height	
This property records the pixel height of the data object; it approximates a dimension that is part of the image data analysis.	 CIDOC CRM v.3.2.1

L56 has pixel width	
This property records the pixel width of the data object; it approximates a dimension that is part of the image data analysis.	 CIDOC CRM v.3.2.1

P7 took place at	
This property describes the spatial location of an instance of E4 Period. The related instance of E53 Place should be seen as a wider approximation of the geometric area	 CIDOC CRM v.7.1.3

P4 has time-span	
This property associates an instance of E2 Temporal Entity with the instance of E52 Time-Span during which it was on-going. The associated instance of E52 Time-	 CIDOC CRM v.7.1.3

P2 has type	
This property allows sub typing of CIDOC CRM entities – a form of specialisation – through the use of a terminological hierarchy, or thesaurus. The CIDOC CRM is	 CIDOC CRM v.7.1.3

P4 has time-span	
This property associates an instance of E2 Temporal Entity with the instance of E52 Time-Span during which it was on-going. The associated instance of E52 Time-	 CIDOC CRM v.7.1.3

P7 took place at	
This property describes the spatial location of an instance of E4 Period. The related instance of E53 Place should be seen as a wider approximation of the geometric area	 CIDOC CRM v.7.1.3

P4 has time-span	
This property associates an instance of E2 Temporal Entity with the instance of E52 Time-Span during which it was on-going. The associated instance of E52 Time-	 CIDOC CRM v.7.1.3

P2 has type	
This property allows sub typing of CIDOC CRM entities – a form of specialisation – through the use of a terminological hierarchy, or thesaurus. The CIDOC CRM is	 CIDOC CRM v.7.1.3

P1 is identified by	
This property describes the naming or identification of any real-world item by a name or any other identifier. This property is intended for identifiers in general	 CIDOC CRM v.7.1.3
